

NEW PRODUCT UPDATE

Fiberglass Manhole Adhesive Joint with Concrete Base

Introducing a new Adhesive Joint for fiberglass manholes and wetwells with a concrete slab base. Fiberglass manholes and wetwells require the use of a concrete base to offset buoyancy. This innovative joint allows CSI to deliver manholes or wetwells with concrete slabs to a site ready for installation. The barrel is connected on-site to the base at the adhesive channel. Installation times can be reduced by more than 60% in some cases.
