For this warranty to be valid the tank must have been installed by a qualified installer trained in accordance with the C.S.I. contractor training course and all available installation instructions. To be qualified the installing company must have a valid certificate of completion on file with C.S.I. at the time of installation. The completed checklist must be delivered to C.S.I. only at the time of any claim under this warranty, and failure to do so may result in denial of the claim at the discretion of C.S.I. A claimant must give C.S.I. the opportunity to observe and inspect the tank prior to the removal of any backfill surrounding the tank, removal of the tank from the ground, or removal of any factory installed appurtenance, or the claim will be barred.

If any tank is removed from an installation, moved to owner's new location and is intended for active service at the new location, the tank must be recertified by C.S.I. in order to maintain the warranty as originally extended.
